RELEVANT SKILLS

- Java
- JavaScript
- PHP
- MySQL
- MongoDB
- React
- HTML/CSS
- UI/UX Designing

ABOUT ME

I am a dedicated Computer Science undergraduate with a strong foundation in software development, algorithms, and problem-solving. My academic background and hands-on project experience have equipped me with skills in programming languages like Java, JavaScript, as well as familiarity with frameworks such as React and Node.js. I am passionate about applying my technical skills in real-world settings, constantly seeking opportunities to expand my knowledge and contribute to meaningful projects. I am excited to leverage my enthusiasm for technology and learning in a collaborative software engineering environment.

PROFESSIONAL EXPERIENCE

- Member of IEEE Women In Engineering
- Member of IEEE Computational Intelligence Society
- Member of IEEE Student Branch, University of Jaffna

ACHIEVEMENTS

- Certificate for selected to top 5 final teams in "Fuel Asia 2023 - APAC's Largest University Innovation Program" launched by Futurize.
- Certificate for completed the Mastering Deep Learning with Hands-On workshop, covering deep learning architectures, applications, and convolutional neural networks.

PROJECTS

- Certificate Management System(,html,css,JS)
- Taskly To-Do App(ReactJS)
- PySimulator Cookie Detect Project(Python)
- Student Management System(Java,Node js)
